4-Day Program: "Machinery Vibrations Level I"

January 5-8, 2009

Certification Exam on the 9th if desired

Hosted by

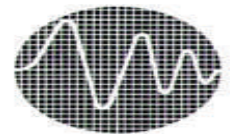

Atrium Technology Center

1201 W. Willow, Enid, OK

Instructor:

Introduction to Machinery Vibrations is recommended for individuals with less than two years experience. It will help you prepare for the Vibration Analyst Category I certification exam.

Vibration Institute
A NOT-FOR-PROFIT CORPORATION

The objective of all the Vibration Institute courses is to prepare the technician to be a better analyst. Institute courses will enable you to gain understanding of vibration principles and techniques and add to your practical knowledge of machines. With these tools you will be better able to think through vibration problems.

Registration will be limited to the first 10 OPMUG members that register

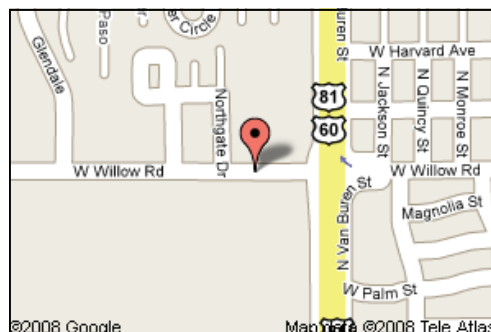

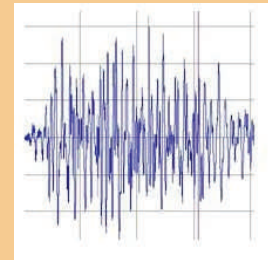

Attendees will receive a Certificate of Completion with credit for contact and professional hours. Register on this website to reserve a seat for this session

<http://www.opmug.net/> or gburkett@atrytech.com

Vibration Institute courses are designed to provide you with theory, techniques, and procedures as well as practical case histories that illustrate ways to analyze various types of equipment. In-class demonstration and workshops will help you learn the methods used to solve vibration problems.

Vibration Level 1 Training Course Objectives

- Vibration: Sources, uses and effects
- Definitions, terminology, measurements and demonstrations.
- Analysis, natural frequencies.
- Data collection demonstrations
- Machine knowledge
- Vibration Testing
- Basic Spectrum Analysis
- Common Machine Faults
- Vibration Severity
- Preparation for Category I Vibration Exam
